

**Canadian Journal of Animal Science – 2010, Volume 90**  
**Annual Report to the Canadian Society of Animal Science**  
**May 2011 (Halifax, NS)**

**Editorial Board:**

Volume 90 (2010) was produced by an Editorial Board of 21 Associate Editors and Dr Chantal Farmer as Editor-in-chief. Six Associate Editors completed their mandate in December 2010; they were J. Bailey, K. Koenig, T. McAllister, M.F. Palin, K. Schwartzkopf-Genswein and F. Silversides. Drs. McAllister, Palin and Silversides were appointed to another 3-year mandate starting January 2011. Three new Associate Editors started a first mandate in January 2011, being, S. Donkin (Ruminant Nutrition), K. Swanson (Ruminant Nutrition) and Luciano Gonzalez (Behavior and Management). Four statistical consultants agreed to help out Associate Editors in 2010, they are R. Cue, S. Méthot, R. Tempelman and Z. Wang. In 2011, three statistical consultants will be available, R. Cue and Z. Wang as well as S. Méthot, the latter starting in May. R. Berthiaume was the CSAS liaison on the CJAS Editorial Board in 2010 and T. McAllister and C. Gariépy were on the Scientific Journals Committee. Great thanks to all these people for their wonderful contribution to the Journal.

**Journal Statistics:**

Current CJAS statistics (Tables 1 to 3) give an overview of the performance of the Journal during 2010. Table 1 shows that as in previous years, the greatest number of published manuscripts was in the area of Ruminant Nutrition, (21). The second area with most papers was, as in 2009, Non-Ruminant Nutrition (12), followed closely by Welfare, Behaviour and Management (9). There was a sharp decline in papers published in Breeding and Genetics (1 instead of 9). Three reviews were published in 2010. The total number of published papers (and pages) slightly increased between 2009 and 2010.

Table 2 indicates that the number of submitted manuscripts in 2010 (138) increased as compared to last year (123). Of these, 11 are still in progress, yet when looking only at papers and short communications which are not outstanding (Table 2), the rejection rate is 43%. Up to now, in 2010, the rejection rates of AAFC, University and foreign papers were, respectively, 20 %, 24 % and 71 % (Table 4). This last number is a slight improvement as compared to the 77 % seen in 2009. As compared to last years, time to complete the review process increased (51 days) for Short Communications but decreased (24 days) for full papers (Table 3).

The number of submissions (Table 4) from Universities has kept quite constant (35 in 2010, 36 in 2009, 38 in 2008 and 40 in 2007) but the number of manuscripts from AAFC decreased from 30 in 2007 to 21 in 2008 and 20 in 2009 but only 11 in 2010. Submission of foreign manuscripts (88) was higher than last year (67). Unlike what was expected, the lower page charges for CSAS members starting in January 2010 did not help to increase submissions from AAFC scientists in 2010.

**Editorial board meetings and SJC follow-ups:**

The SJC committee held its annual meeting last November in Ottawa and some important follow-ups are:

1. Open access availability to CJAS has been extended to all but the current and previous 2 years' journals
2. In press manuscripts are now available on the CJAS site. When proofs have been corrected they are published on the web site. Because the journal is published every quarter there will be periods between the publication of one issue and the beginning of the next issue when there are no in-press papers on the web.
3. Publication of individual papers on an open access basis is now available. Authors will be charged \$1000.00 per paper in addition to regular page charges for open access.

**Other business:**

1. CJAS had applied for inclusion in the PubMed database. Sadly, it had been refused by the National Library of Medicine committee on the basis that the journal provides very little information relevant to humans. CJAS Editorial Board is currently in discussion about ways to improve CJAS reputation. Many suggestions have been made, studies for implementation of them are in progress. Suggestions to improve CJAS readership could be forwarded to me.

Respectfully submitted,

Christiane Girard  
Editor-in-chief, CJAS  
April 18, 2010
